NGUYEN MANH KHANG

Long An, Viet Nam | nguyenmanhkhang2002@gmail.com | (+84) 856-676-838

PROFILE SUMMARY

- I am a software developer with approximately 1 year of experience using Java and Spring Framework for web projects.
- Designed and developed databases for projects related to admissions and sales, integrating technologies such as JavaMail, Cloudinary, Spring Security, and JWT for enhanced functionality and security.
- In the near future, my long-term goal is to become a Software Architect.

EDUCATION

Ho Chi Minh City Open University **Oct 2020 – Sep 2024**

Specialized Database

RELEVANT COURSEWORK

Database Management Systems | Software Engineering | Web Development | Mobile Application Development | Software Testing and Quality Assurance | Distributed Systems | Samsung Innovation Campus

EXPERIENCE

Wisdom Engineering & Business Solutions Company – *Intern* **Tan Binh district, Ho Chi Minh City**

Position: *Full-stack Developer* **Jan 2024 – Aug 2024**

- Utilized various relational databases such as PostgreSQL, MySQL, and SQL Server to design and build databases for projects.
- Implemented Firebase Authentication for user authentication.
- Developed Web API using Spring Boot.
- Ensured security of Web API using JWT, OAuth2, and Spring Security.
- Utilized JavaMail as the email service provider.

TECHNICAL SKILLS

- Backend: Java, Spring Boot, RESTful APIs
- Frontend: HTML, CSS, JavaScript, ReactJS, Angular, Ionic Framework
- ORM: Hibernate
- Database: SQL Server, MySQL, PostgreSQL, Firebase
- API: Postman, Swagger
- Testing: Unit Test
- Source Control: Git
- Other: Notion, Trello, Figma

SOFT SKILLS

- Teamwork
- Investigate
- Self-Learning
- Communicate
- Problem-solving
- Open Mindset

PROJECT EXPERIENCE

Back-end EasyJob **Jun 2024 - Nov 2024**

Repository: Khang0202/BE-easyjob (github.com)

Team Size: 3

Back-end Developer

- Designed and implemented a web application Spring Framework to build RESTful APIs
- Integrated Cloudinary for efficient image storage.
- Implement OAuth2 for feature Google Sign in.
- Utilized MySQL for reliable data management.
- Enhanced security using Redis in conjunction with JWT.
- Optimized data retrieval with multi-criteria filtering and pagination through JPA Specification Executor.

Traffic Congestion Alert Application **Sep 2023 - Nov 2023**

Repository: Khang0202/Traffic-Congestion-Alert-Application (github.com)

Java Developer

- Display traffic alerts uploaded by other users within the app.
- Develop web service and API server using ASP.Net Core Web API.
- Integrate Google Maps API on the homepage.
- Utilize Cloudinary for image storage.
- Implement OAuth2 to enhance security for the Web API.
- Employ MS-SQL as the database.
- Use JWT for authentication purposes.
- Utilize Mailgun as the email service provider for the forgot password functionality.

Project Outsource – Intern **Jan 2024 – Aug 2024**

Full-stack Developer

- Interned at Wisdom Engineering & Business Company
- Employed SQL Server, MySQL, PostgreSQL and Firebase as databases.
- Implemented Firebase Authentication for user authentication.
- Developed Web API using Spring Boot.
- Ensured security of Web API using JWT, OAuth2, and Spring Security.
- Utilized JavaMail as the email service provider.
